Frequently Asked Questions on VerifyDoc

1. What is VerifyDoc?

VerifyDoc is a digital platform that allows citizens, employers, and institutions to issue, store, and verify the authenticity of credentials. It helps citizens keep their credentials in a secure digital wallet, and helps employers confirm whether a credential shared with them is authentic.

2. Who Can Use VerifyDoc?

- **Citizen** — Student, graduate, learner, or credential holder
- **Employer** — Company, recruiter, HR team, or recruitment agency
- **Institution** — University, polytechnic, bootcamp, or training provider

3. What Credentials Can VerifyDoc Verify?

- Academic certificates, diplomas, degrees, and transcripts
- ND, HND, and short-course credentials
- Professional and vocational certificates

4. Account & Registration

How do I create a VerifyDoc account? Go to the sign-up page for your user type (citizen, employer, or institution), enter the required registration details, and submit the form. Employers and institutions also need Platform Admin approval before they can access protected features.

Do I need an account to verify a credential? Yes. Employers must register and be approved before they can view credentials shared with them, and institutions must register and be approved before they can confirm or respond to verification requests.

What information do I need to register?

Account Type	Personal / Account Holder Details	Organization / Institution Details
Organization (Employer)	• First name • Last name • Email • Phone number • Password	• Organization name • Organization type • CAC number • CAC certificate • Official organization email • Organization phone number • Address • Website (optional)
Institution	• First name • Last name • Email • Phone number • Password	• Institution name • Institution type • Official email • Phone number • Address • Website (optional)

		• Accreditation document

I forgot my password. How do I reset it?

A forgot password link is present. Click on it and follow the process

Can I delete my VerifyDoc account?

You can’t delete your VerifyDoc account yet

5. Credential Verification

How does VerifyDoc verify a credential?

A citizen shares a specific credential with an approved employer, setting a purpose and expiry for that access. The employer can then view the credential's status. If they need an up-to-date check, they can request fresh confirmation directly from the issuing institution, which responds by confirming, rejecting, or marking it for manual review.

How long does verification take?

A credential can be verified immediately either by scanning the QR code or by inputting the credential ID.

Can a credential be verified more than once?

Yes. An employer can request fresh confirmation of a credential they've already received, and the issuing institution provides an updated result.

What does Verified mean?

The credential has been confirmed as authentic and is currently active.

What does Pending mean?

The credential is awaiting confirmation from the issuing institution.

What does Revoked mean?

The issuing institution has withdrawn the credential; it's no longer valid.

What does Expired mean?

The credential is no longer within its valid period.

6. Verification Results

Where can I see my verification result?

From your dashboard, in your sharing activity. Each entry shows the employer, purpose, and current status of that share.

How do I interpret my verification result?

Check the credential's status: Verified, Pending, Revoked, or Expired.

How do I share my verification result with an employer?

Select the credential in your wallet, choose an approved employer, set a purpose and expiry, then review and confirm the share.

How long is a verification result valid?

By default, a shared credential is accessible to the employer for **7 days**, after which access automatically ends.

7. Employer/Organization Verification

How can an employer verify a candidate's credential?

Once approved, an employer can view any credential a citizen has shared with their organization, and request fresh confirmation from the issuing institution if needed.

8. Institution/Issuer Questions

How can an institution register with VerifyDoc? Submit your institution's details through the registration process. Your application is reviewed by the Platform Admin, and you'll be able to see your approval status before gaining access to institution features.

How does an institution respond to a verification request? When an employer requests fresh confirmation of a credential, the institution reviews it and responds by confirming it, rejecting it, or marking it for manual review.

Can institutions issue digital credentials through VerifyDoc? Yes. Once approved, an institution can issue a credential directly to a citizen, which is then securely stored in that citizen's wallet.

9. Privacy & Security

Is my personal information safe?

Yes, your personal information is safe. VerifyDoc does not share information with unverified third parties.

Who can see my documents?

Only you and approved organizations can see the documents you choose to share.

- Does VerifyDoc share my information with third parties?
- How long is my information stored?
- How can I request deletion of my data?
- How does VerifyDoc prevent fraudulent credentials?

Needs input from: Devs

10. Troubleshooting

- I can't log in. What should I do?
- My verification is taking too long. What should I do?
- I received an error message. What does it mean?
- The verification result looks incorrect. What should I do?
- The verification link isn't working. What should I do?
- I didn't receive my verification email.

Needs input from: Product Manager/Devs

11. Support

How do I contact VerifyDoc support?

Send a mail to Support

What information should I provide when contacting support?

What are VerifyDoc's support hours?

Support is available 7am - 5pm Monday to Friday.

How long does it take to receive a response?

After your complaint has been logged, a response would be available to you as soon as possible.
